SUMMARY

Aspiring Software Engineer with a strong foundation in Java, Object-Oriented Programming, Data Structures, and full-stack web development. Skilled in building backend applications and REST APIs using Spring Boot, Hibernate, JDBC, and SQL. Passionate about problem solving and writing clean, maintainable, and scalable code.

TECHNICAL SKILLS

Programming Languages: Java, C, SQL

Web Technologies: HTML, CSS, JavaScript, Bootstrap

Frameworks & Libraries: Spring, Spring Boot, Hibernate, JDBC

Databases: SQL, MySQL

Tools & Platforms: Git, GitHub, REST APIs

Concepts: Data Structures, OOPS, DBMS, Web Security (OWASP)

EDUCATION

K.S.R. College of Engineering

B.E. Mechanical Engineering — CGPA: 7.8 / 10

Erode, Tamil Nadu

2021 – 2025

Government Hr. Sec. School, Minnapalayam

Class XII, State Board — 63.8% | Class X, State Board — 60%

Tamil Nadu

PROJECTS

Smart Parking Management System | *Java, Spring Boot, Hibernate, JDBC, MySQL, REST API*

- Built a full-stack smart parking application using **Spring Boot**, **Hibernate ORM**, and **MySQL** that tracks real-time slot availability and lets users search and book parking slots, with a responsive front-end in HTML, CSS, and JavaScript.
- Designed **RESTful APIs** for slot allocation, booking, and CRUD operations, and used JDBC and Hibernate for efficient, transaction-safe database access.
- Implemented role-based authentication (Admin / User), automated slot-release logic, and server-side input validation following OWASP security best practices.

Smart Inventory Prediction System | *Java, Spring Boot, Hibernate, JDBC, MySQL, REST API*

- Developed a full-stack inventory management application with **Spring Boot** REST APIs, **Hibernate**, and a **MySQL** database to track stock levels, sales, and supplier records.
- Implemented demand-prediction and automated reorder logic that analyzes historical usage to forecast low-stock items and trigger restock alerts.
- Built CRUD operations, role-based access control, and an interactive dashboard using HTML, CSS, and JavaScript to visualize inventory trends.

Personal Portfolio Website | *HTML, CSS, JavaScript, Bootstrap*

Live Demo

- Designed and developed a responsive personal portfolio website to showcase projects, skills, and achievements across multiple screen sizes.
- Deployed the website on **GitHub Pages** for public access.

INTERNSHIP

SAN Technovation

July 2024

Design Intern

- Worked with AutoCAD and Creo for 2D drafting and part modeling, strengthening analytical and structured problem-solving skills.

CERTIFICATIONS

Introduction to HTML & CSS — GUVI

Rapid Manufacturing — NPTEL

ACHIEVEMENTS & ACTIVITIES

- 4-Star rating in C Programming on HackerRank.
- Solved multiple Data Structures & Algorithms problems on LeetCode using Java.
- Participated in the Smart India Hackathon (SIH) and presented a technical paper at an inter-college event.
